DECIDE Tool Card #1

To help kids (and parents) understanding the functioning of the clean energy system and sustainability

Who? School age kids assisted

Time? Anytime

The power of community is an educational board-game that uses kids' creativity to explore with them the functioning of the energy system and renewable energy sources, to learn more about the barriers and the benefit of pursuing energy transition and to discover the role that each one can play in it. The kit is available in different languages and a copy (educational and not for commercial use) can be requested online.
