

H2020 Compile - Integrating community power in energy islands

Compile

- Opportunities of energy communities for decarbonisation, community building and environmental and socioeconomic benefits
- Compile consortium is build from:
 - 12 partners from 7 countries
 - 2 international partners (India and China)
- Nov 2018 – Oct 2022
- 5 pilot projects

Dorian Frieden, JOANNEUM RESEARCH, Austria

Some examples for barriers

Compile

- Croatia: Cooperative law (loss of unemployment assurance), permitting process for grid connection
- Greece: Same supplier required
- Spain: Current CSC provisions may require several entities to cover, e.g., a municipality (LV transformer, 500m)
- Slovenia: Restriction to same LV transformer
- Portugal: Administrative procedures, uncertainty about eligibility (<-> e.g. proximity of members)

Generally: Support, market integration, infrastructure (smart meter)...
